PROJECTS

Library Management System in Java using JFrame, Mysql in Netbeans IDE

- 1. Login Page: In this page we have to fields username and password. When we enter in-correct username and password it will show a popup message Incorrect Username or Password. If we enter correct username or password we will move to next page. It having one more button for exit this application.
- 2. Home Page: After login this one is first page. In this page we have six button and each button having different functionality.

Bank Management System in Java Console based stand Alone Application

- create a stand alone mini-application for a banking system in Java. In this program, we will add some basic functionalities of a bank account like a deposit of amount, withdrawal of amount, etc.
- Initially, the program accepts the number of customers we need to add and adds the customer and account details accordingly. Further, it displays the series of menus to operate over the accounts.

PERSONAL PROFILE
